Abstract - Higher education system various new methodologies are used which helps to make learning very effective which is the principle of the quality education. Introducing the audio visual aids in teaching itself was overwhelming. It made a great break in teaching learning several decades ago. The rationale was, "What you hear you remember temporarily, what you see you remembered better and what you do will remembered forever." This is the principle behind experiential methodology. It ease commonly independent and collaborative learning experience , computer based qualitative and quantitative assessment modules are evaluate to understand the course material. By recognizing the need of revolution in higher education university introduces blended learning which support in designing the curriculum, advancement infrastructure and training & support necessary to deliver higher education in a digital era.

Key words- ICT ,Higher Education, Teaching, Learning.

Dr. Radhakrishnan one of the greatest teacher once said, "Until and unless we have dedicated and committed teacher who can take teaching as a mission in their lives. We can't have a good educational system. Teacher should be the best minds of the country" Dr. Radhakrishnan explains the good qualities of teacher that should possess by every teacher to earnestly promote the great mission of teaching skills & competency dedication & innovativeness, influencing & spruce teacher behaviors all sealed in genuine quality is the need of the hour. The heart of the nation today calls for good teacher.

The world of both parents and teacher are very important for the development of personality and attitude behavior & value development of the child. A teacher unlike an artist or a sculptor has to handle growing developing humble being with the heart & mind. The role of teacher in shaping the personality of students are formidable.

Sydney Harris says that " The best thing we can give to our children next to good habits is good memories." Teacher with their effective & dynamic teaching action can leave behind good memories in the mind of students.

In order to make the learning experiences of the students more concrete and realistic various types of teaching aids used by the teacher which are very effective on students? It is said that 'Learning by doing is seeing is better that hearing to implant in their mind more meaningful and impressive learning experiences always provide the students more sensory experiences with the help of different teaching aids to make teaching interesting.

When teacher are making use of the selected and positive teaching aids during their periods of classroom teaching, it activates the sensory channels of the body thus maximizing learning. Teaching aids certainly increase teacher effortful presentation more in to influencing.

To extend and enhance their learning we need to take initiative to use interesting and fitting teaching aids. There are so many advantages of such teaching materials that offers teachers powerful means to make their teaching achieve specific classroom objectives. Effective teaching aids protested the students which cause creating interest and therefore learning becomes more interesting and fertile. Good teaching aids can help students in pursuing the knowledge & to retain it for a lifelong because of in the presence of it learning experiences becomes more meaningful and satisfactory. It can help to enhance the imaginal thinking and reasoning power of the students.

The use of innovative teaching aids can help to save time & energy of the teacher for clarifying the concept of students. Some of the teaching learning resources that find a valuable role in the program me are-

- Black Board/ Glass Board
- Charts, Posters, and Flannel Boards
- Models & Specimens
- Overhead projectors & Transparencies
- Projector & Slides
- Computer Related Accessories

All above teaching aids are very useful to learners as well as teachers. Present day children are part of a world with an information explosion & rapidly progressing communication technologies computer technology that has made known its vast potential in different fields has ultimately established that it can make enriching effect on the classroom teaching excellence.

All over the world India has popular as a second largest higher education system. Although the Indian higher education has already entered a stage of massification. In past couple of decades rapid changes occurs in the field of Information and Technology . To enhance the quality of teaching and learning a significant changes occurs in the previous education policy of 1986/92. Which have opened to use ICT in various manners which helps to manage the sector as well as directly assist to enhance the quality of education.

Higher education system various new methodologies are used which helps to make learning very effective which is the principle of the quality education. Introducing the audio visual aids in teaching itself was overwhelming. It made a great break through in teaching learning several decades ago.

The rationale was “What you hear you remember temporarily, what you see you remembered better and What you do will remembered forever.” This is the principle behind experiential methodology.

Blended Learning:

Blended Learning includes combination of online digital media with traditional classroom method. In this learning method teacher and students both should be physical present. There are various ways to introduce blended learning practices. Blended learning is more effective than purely face to face or purely online classes, which helps students to achieve best result. Computer based qualitative and quantitative modules are used by the students to evaluate and understand the course material.

Universities are support to blended learning as it is a need of revolution in higher education. By changing the designed curriculum academic practice and development of infrastructure and training which support necessary to deliver in higher education in a digital age.

The ICT can best be understood by the definition provided by the United Nations development program me “ICT’s are information handling tools a varied set of goods, application & services that are used to produce, store, process distribute & exchange information. New ICT’s of computer, satellite and wireless technology & the internet these different tools are used combine to form a networked world”.

The use of multimedia to modify the material helps teacher to represent in a more meaningful way. Using different media elements creating multimedia project is both challenging and exciting. Across the world information technology is the best alternative for the students. The demand for technology continues to rise colleges and universities are moving all sorts of student services.

Conclusion:

There is need to employ innovative approaches in higher education teaching learning. Education system over the years have gone through various changes which had its impact on the education system.

Innovation involves action it requires more than the having of wonderful ideas. With the help of innovations in practical way to solve problems, it is a social phenomenon.
