

**RESEARCH & PUBLICATION ETHICS POLICY**

**1. Commitment to Research Integrity**

Library Scholar is committed to maintaining high standards of research integrity, academic honesty, transparency, and responsible publication. All manuscripts must comply with accepted ethical standards applicable to scholarly research and publication.

**2. Originality and Plagiarism**

Authors must submit original work that has not been published or simultaneously submitted elsewhere. Plagiarism, self-plagiarism, duplicate publication, fabrication, falsification, and manipulation of research findings are unacceptable. Manuscripts may be checked for plagiarism and academic misconduct.

**3. Authorship**

Authorship should be limited to those who have made substantial contributions to the research and manuscript. All listed authors must approve the final manuscript and agree to its submission. Any change in authorship should have the agreement of all authors.

**4. Research Ethics and Informed Consent**

Research involving human participants, personal information, interviews, or surveys must follow applicable ethical requirements. Where necessary, authors must obtain appropriate ethical approval and informed consent and protect participants' privacy and confidentiality.

**5. Conflict of Interest and Funding**

Authors, reviewers, and editors must disclose any actual or potential conflict of interest. Authors should also disclose relevant sources of financial or institutional support for the research.

**6. Responsibilities of Reviewers**

Reviewers must evaluate manuscripts objectively, maintain confidentiality, avoid conflicts of interest, and provide constructive scholarly comments. Unpublished information obtained during peer review must not be used for personal advantage.

**7. Responsibilities of Editors**

Editors must make fair and impartial decisions based on academic quality, relevance, originality, and ethical standards. They must maintain confidentiality, manage conflicts of interest, and investigate credible allegations of research or publication misconduct.

**8. Corrections and Retractions**

The journal will take appropriate action to correct the scholarly record when significant errors or ethical violations are identified. Depending on the circumstances, the journal may publish a correction, issue an editorial notice, or retract an article.

## **9. Use of Artificial Intelligence**

Authors remain fully responsible for the accuracy, originality, citations, and ethical integrity of their manuscripts. AI tools must not be listed as authors. Substantive use of AI in preparing a manuscript should be disclosed where appropriate, and confidential research material should not be entered into AI systems in a manner that compromises privacy or confidentiality.

## **10. Ethical Conduct and Misconduct**

The journal will consider allegations of research or publication misconduct fairly and confidentially. Authors, reviewers, and editors are expected to cooperate with reasonable investigations and to uphold the principles of honesty, transparency, accountability, and respect for the scholarly record.
